The UNL Biomedical Engineering Society invites you to…

KECK GRADUATE INSTITUTE
of Applied Life Sciences

Preparing for the Business of Bioscience

For students with science, engineering, computational, or pre-med backgrounds who are interested in preparing for management careers in the biosciences industry.

Join Keck Graduate Institute President, Dr. Sheldon Schuster, for an informal presentation

Tuesday, February 10, 2004
5:00 PM
129/130 Nebraska Hall

Pizza and beverages provided

Keck Graduate Institute, in partnership with industry leaders, prepares students for management positions in the full array of bioscience industries—pharmaceuticals, medical devices, instrumentation, bioinformatics, and others. Its two-year professional Master of Bioscience (MBS) program fills a unique niche: educating scientifically proficient professionals who can oversee development of useful new products and applications from basic life sciences research and address the business, policy, and ethical challenges of management.
